WORK EXPERIENCE

Assistant DevRel
Google

📅 January 2019 – Present   📍 New York, NY

- Surface API issues and organized improvements
- Developed open-source tools and samples for developer community

Smart Home   Voice Technology   Node.js

IoT DevRel
Google

📅 June 2017 – January 2019   📍 Mountain View, CA

- Built samples and contributed to design of Android Things and Assistant SDK platforms
- Attended external corporate workshops and assisted interested developers

Embedded Software Design   AI   Voice Technology

Android TV Intern
Google

📅 May 2016 – Aug 2016   📍 Mountain View, CA

- Designed Live TV API for a developer-friendly audience
- Implemented and published as open-source library

Android   API

EDUCATION

Masters in Electrical & Computer Engineering
Rowan University

📅 September 2019 – Ongoing   📍 Glassboro, NJ

Bachelor in Electrical & Computer Engineering, Minor in Computer Science
Rowan University

📅 May 2017   📍 Glassboro, NJ

PROJECTS

Cubesat
University Clinic Project

- School project to develop **CubeSat** for testing novel memory technologies against radioactivity in space environments
- Led **Command & Data Handling** to develop software core

Typedoc Neo Theme
Open Source Project at Google

- Created & published new open source theme with readability improvements
- Project averages **> 5K weekly downloads**, adopted for **Yarn reference docs**

Cyanobyte
Open Source Project at Google

- Open-source standardized spec for generating peripheral drivers

ACHIEVEMENTS

🏆 **First Place at PennApps**
Part of a team that developed skin-safe tattoo capacitive touch sensors, winning first place at world's largest univerisity hackathon.

Teamwork   BLE

Embedded Software Design

Project Management

🏆 **Best Design Award**
Built nutrition check-in Android app with ML-based camera scanner

Android   UI Design

Machine Learning

⊚ **Eagle Scout**

SKILLS

Languages
- Java, JavaScript, TypeScript, C, C++, Golang, HTML, PHP, Python, MATLAB, Mathematica, C#, Verilog, MySQL, TI-Basic

Hardware
- Arduino, ESP32, Raspberry Pi, DE0 Nano FPGA

Software Services
- Actions on Google, Firebase, Google Cloud, Heroku

Frameworks
- Node.js, Angular, jQuery, Bootstrap, Polymer, Flask

Software
- Adobe Premiere / Illustrator / Photoshop / Audition, Microsoft Office, Google Workspace, TI-Spice

EXTRACURRICULARS

IEEE, New York Section
- Young Professionals, Vice Chair Feb 2020 – Present
